Introduction to the Fiat 132

The Fiat 132 was introduced in 1972 as a successor to the Fiat 125, aiming to compete in the increasingly competitive mid-size sedan segment across Europe. It was designed to appeal to a broad customer base, from families to business professionals, with its blend of comfort, practicality, and advanced features for its time.

The availability of a manual transmission was a critical aspect of the model, catering to driving enthusiasts and those seeking a more engaged driving experience. Historical Context and Development

Market Position and Competition

During the early 1970s, the automotive market in Europe was marked by rapid technological progress and shifting consumer preferences. Fiat aimed to position the 132 as a premium offering in the mid-size segment, competing with cars like the Opel Ascona, Ford Cortina, and Volkswagen
