The Core Components of Mark Crisp's Momentum Stock Trading System

Crisp's system revolves around a combination of technical indicators, chart patterns, and strict entry/exit criteria. Here's an in-depth look at its fundamental components:

- Technical Indicators

Crisp's methodology heavily relies on specific indicators to identify momentum and confirm trade signals:

- Moving Averages (MA): Typically uses short-term (e.g., 10-day) and longer-term (e.g., 50-day) moving averages to gauge trend direction.
- Relative Strength Index (RSI): Measures the speed and change of price movements, identifying overbought or oversold conditions.
- Moving Average Convergence Divergence (MACD): Detects momentum shifts and trend reversals.
- Volume: A key metric to confirm the strength of a move; rising volume with price increases signals genuine momentum.

- Chart Patterns and Price Action

Crisp emphasizes recognizing specific chart patterns that indicate strong momentum:

- Breakouts: Price closing above resistance levels with high volume.
- Pullbacks: Entries during minor corrections within an ongoing trend.
- Trendlines: Maintaining and respecting trendlines as dynamic support or resistance levels.

- Entry Criteria

The system specifies precise conditions for initiating trades:

- Trend Confirmation: Price must be above the short-term moving average (indicating an uptrend) or below for a downtrend.
- Momentum Signal: Indicators like MACD or RSI crossing certain thresholds suggest momentum is building.
- Volume Confirmation: Increased volume supporting the move.
- Breakout Validity: Price surpasses a resistance level with strong volume.

- Exit Strategies

Maintaining discipline in trade management is crucial:

- Stop-Loss Orders: Placed just below recent support (for long positions) or above resistance (for short positions).
- Profit Targets: Pre-defined based on chart patterns or percentage gains.
- Trailing Stops: Adjusted as the trade moves favorably to lock in profits and protect against reversals.
- Signal Reversal Indicators: Exit if momentum indicators suggest weakening or reversal.
