A budget promotes responsible money management and can prevent debt accumulation by making informed spending decisions.

2. How do you differentiate between needs and wants?

Answer:

Needs are essentials required for basic survival and well-being, such as food, shelter, clothing, and healthcare. Wants are non-essential items that improve comfort or pleasure, like luxury gadgets, dining out, or designer clothing. Differentiating between needs and wants involves assessing whether an expense is necessary for daily life or merely for leisure or status. Prioritizing needs ensures financial stability, while managing wants helps avoid impulsive spending.

The benefit of compound interest is that the longer the money is invested, the more it accrues, leading to significant growth of savings or investments. This concept emphasizes the importance of starting to save early to maximize the benefits of compounding.

5. What are the different types of bank accounts, and how do they differ?
